

Rabix Labs

IT & Information Security Policy

Version: 1.0

Department: Information Technology (IT)

1. Purpose:

The IT & Information Security Policy establishes guidelines to protect company systems, data, and digital resources from unauthorized access, misuse, and security threats.

2. Scope:

This policy applies to all employees, interns, contractors, and anyone who has access to Rabix Labs' systems or data.

3. Password Requirements:

- Use strong passwords with at least 12 characters.
- Include uppercase letters, lowercase letters, numbers, and special characters.
- Do not share passwords with anyone.
- Change passwords immediately if you suspect they have been compromised.

4. Multi-Factor Authentication (MFA):

- MFA must be enabled for all company accounts whenever available.
- Employees should never approve unexpected authentication requests.

5. Device Security:

- Only authorized devices may access company systems.
- Keep operating systems and software updated.
- Install antivirus software on company devices.
- Lock your device when leaving your workspace.

6. Data Protection:

- Company data must only be stored in approved locations.
- Confidential information must not be shared with unauthorized individuals.
- Sensitive files should be encrypted when required.

7. Email Security:

Employees should:

- Be cautious of phishing emails.

- Avoid opening suspicious attachments or links.
- Report suspicious emails to the IT department immediately.

8. Internet Usage:

- Company internet should be used primarily for business purposes.
- Download software only from trusted and approved sources.
- Access to illegal or harmful websites is strictly prohibited.

9. Incident Reporting:

Employees must report the following immediately:

- Lost or stolen devices
- Suspected hacking attempts
- Malware infections
- Data breaches
- Unauthorized system access

10. Compliance:

Failure to follow this policy may result in disciplinary action, including suspension of system access or further administrative action.
